KRISHNANUNNI C G

(737) 781-7685 krishnanunni@utexas.com ◇ Personal website Google Scholar

EDUCATION

The University of Texas at Austin, TX **January 2021 – Present**
Ph.D. in Aerospace Engineering & Engineering Mechanics

Indian Institute of Technology Madras, India **August 2017 – December 2019**
Master of Science in Structural Engineering

National Institute of Technology Calicut, India **August 2013 – August 2017**
Bachelor of Science in Civil Engineering

FELLOWSHIPS, SCHOLARSHIPS, and AWARDS

- Travel Award by the United States Association for Computational Mechanics (USACM), United States National Congress on Computational Mechanics, Albuquerque, USA. **July 2023**
- Travel Award by the Society for Industrial and Applied Mathematics (SIAM), Annual Meeting of the SIAM Texas-Louisiana Section, Houston, USA. **November 2022**
- Best MS Thesis award, Indian Institute of Technology Madras. **August 2020**
- Best Major B. Tech project award, National Institute of Technology, Calicut, India. **August 2017**
- Summer research fellowship, Department of mathematics, IISc, Indian Academy of Sciences. **July 2015**

RECENT JOURNAL PUBLICATIONS

- C. G. Krishnanunni., Tan Bui-Thanh (2022). Layerwise sparsifying training and sequential learning strategy for neural architecture adaptation. (Link)
- Albert Orwa Akuno., L. Leticia Ramirez-Ramirez., Chahak Mehta., C. G. Krishnanunni., Tan Bui-Thanh., Jose Arturo Montoya (2022). Multi-patch epidemic models with partial mobility, residency, and demography. *Chaos, Solitons, & Fractals*. (Link)
- Jonathan Wittmer., C. G. Krishnanunni., Hai Van Nguyen., Tan Bui-Thanh (2023). On Unifying Randomized Methods for Inverse Problems. *Inverse Problems*. (Link)
- C. G. Krishnanunni., B. N. Rao., (2021). Indirect health monitoring of bridges using Tikhonov regularization scheme and signal averaging technique. *Structural Control and Health Monitoring*. (Link)
- Shereena O. A., C. G. Krishnanunni., B. N. Rao., (2022). Simultaneous state-input-stiffness estimation for nonlinear duffing oscillators avoiding Jacobian linearization. *International Journal of Structural Stability and Dynamics*. (Link)

RECENT INVITED TALKS

- Layerwise sparsifying training and sequential learning strategy for neural architecture adaptation. *U. S. National Congress on Computational Mechanics*, New Mexico, July 23-27, 2023.
- A two-stage strategy for neural architecture adaptation. 5^{th} *Annual meeting of the SIAM Texas-Louisiana Section on Uncertainty Quantification*, Houston, November 4-6, 2022.

RESEARCH EXPERIENCE

- **Developing efficient algorithms for neural architecture adaptation**
  Collaborator: Dr. Tan Bui-Thanh (UT Austin, USA)
  - Research in mathematical optimization and machine learning aimed at developing a mathematically principled way for automatically determining neural network architecture for a given data-set.
- **A new look at the Ensemble Kalman filter via duality**
  Collaborator: Dr. Tan Bui-Thanh (UT Austin, USA)
  - Research aimed at the analysis of Ensemble Kalman filter for inverse problems in order to get insights into new convergence improvement strategies.

- **Mathematical epidemiology project**
  Collaborator: Dr. Tan Bui-Thanh (UT Austin, USA) & Leticia Ramirez-Ramirez (CIMAT, Mexico)
  - Research aimed at developing an epidemic model that takes into account the effects of human mobility on the evolution of disease dynamics in a multi-population environment.
- **Indirect health monitoring strategy for bridges**
  Collaborator: Dr. B. N. Rao (IIT Madras, India)
  - Research in the area of signal processing aimed at developing a framework for damage detection in bridges based on dynamic response of a passing vehicle where the vehicle acts as a moving sensor.
- **Solving an inverse eigen value problem in structural mechanics**
  Collaborator: Dr. Mohammed Ameen & Dr. A S. Sajith (NIT Calicut, India)
  - Research aimed at developing a computationally fast and accurate optimization framework to detect and quantify structural damage based on vibrational characteristics.
- **A deep learning framework for solving inverse problems with application to seismic inversion**
  Collaborator: Dr. Dhanya Jaya (IIT Mandi, India)
  - Research aimed at developing novel learning algorithms specifically suitable for inverse problems.

MENTORSHIP

- Moncrief Summer Internship mentor
  - Mentored a summer intern on the work titled *Physics informed deep-learning approach enhanced by POD for forecasting solutions to time-dependent PDE.*
- SIAM-UT Mentorship program
  - Mentored a student on an applied math project related to the use of reinforcement learning for solving a combinatorial optimization problem (nonlinear dimension reduction).

PROFESSIONAL EXPERIENCE

Graduate Teaching Assistant **January 2021 - Present**
UT Austin *Austin, TX*

- Teaching assistant for courses: Analytical methods, Mathematical methods in Engineering.

Graduate Research Assistant **Janary 2021 - Present**
Oden Institute of Computational Engineering & Sciences, UT Austin *Austin, TX*

- Research assistant to Prof. Tan Bui-Thanh, Institute of Computational Engineering and Sciences.

Graduate Teaching Assistant **August 2017 - 2019**
Indian Institute of Technology Madras *Madras, India*

- Teaching assistant for courses: Structural optimization and Finite element analysis.

Research Assistant **January 2020 - December 2020**
Indian Institute of Technology Madras *Madras, India*

- Research assistant to Prof. B. N. Rao, Structural Engineering department, IIT Madras.

JOURNAL ROLES

Peer Reviewer, *Applied Ocean Research,* Elsevier.

SKILLS

Software: MATLAB®, LaTeX®, AutoCAD®, ORIGIN®

Programming Languages: C++, Java, Python
